RE: Sensitive Plant Survey for 2049 Sweetwater Road – TM 5392

Dear Mr. Hoss,

A sensitive plant survey was performed by Andrew Drummond of RC Biological Consulting on your parcel at 2049 Sweetwater Road, Spring Valley on June 2, 2005. Survey conditions were cloudy, 64° Fahrenheit, and 0-3 mph winds. The sensitive plant survey focused on the fourteen plant species listed by the county as having a high potential for occurrence on-site. No sensitive plant species were found during the survey. Due to the history of disturbance and abundance of non-native plants species, it is unlikely that sensitive plant species inhabit this parcel. A complete list of plant species observed can be found in the enclosed attachment.

If you have any question please do not hesitate to call.

Sincerely,

Robin Church
